Nifty, opened higher traded with choppiness and finally managed to close in green. On the daily chart, we are observing that prices have taken support near the lower trendline of falling channel (shown above in the graph) and has close above the previous day high. Hence, a bounce from current level cannot be ruled out. In coming trading session if nifty trades above 17740 level then it may test 17840 - 17950 levels. On the downside 17560 - 17450 levels may act as support for the day.

We maintain our stance that trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.
