Market Technical Outlook

Nifty opened with positive note and throughout day it trade in positive zone and managed to close in green. On the daily chart we are observing breakout of consolidation this suggests upside momentum. Bank nifty has also given consolidation breakout , now seems banking stocks can also perform. In coming trading session if Nifty for first hour trades above 16960 levels then it may test 17100 - 17250 levels. On the downside, 16800 – 16720 levels may act as support for the day. **We still continue to maintain our stance that stock specific activity is likely to continue.**
