Nifty, opened higher but was unable to sustain the opening gains and selling dragged down Nifty to close in red. We still continue to maintain our stance that on the daily chart we are observing series of narrow range body formation which suggests that markets are cautiously positive at current level. In coming trading session if Nifty for first hour trades 15769 level then it may test 15850 - 16950 levels. On the downside, 15600–15520 levels may act as support for the day.

We still maintain our stance that stock specific activity is likely to continue in small and Mid-cap stocks.
