Market Technical Outlook

Nifty opened up with a gap traded with positive bias throughout the day to close in green. On the daily chart, we are observing that prices have close convincingly above the falling 200-days SMA (17035). This suggests that momentum on the upside is likely to continue. In coming trading session if nifty for first hour trades above 17172 then it may test 17260 – 17300 levels, On the downside, 17050 – 16950 levels may act as support for the day.

At present looking at the current price action it is evident that momentum on the upside is likely to continue. However, a consolidation or a minor pullback cannot be ruled out. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
