Market Technical Outlook

Nifty, opened on a flat note but momentum on the upside was seen during the day to close in green. On the daily chart, we are observing that prices have close above the supply zone of 17863 to 17800. At present, we are witnessing an inverse bullish Head & shoulder pattern breakout. This suggests that momentum on the upside is likely to continue. In coming trading session if nifty trades above 17932 then it may test 18000 – 18100 levels. On the downside, 17810– 17690 levels may act as support for the day. **Broadly, looking at the bullish inverse head and shoulder breakout, we are of the opinion that momentum on the upside is likely to continue and 17500 now remain strong support for the market. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.**
