**Market Technical Outlook** 

Nifty opened higher traded with positive bias throughout the day to close in green. On the daily chart, we are observing that prices for two consecutive trading session have close convincingly above the falling 200-daysSMA (17020). Hence a consolidation or minor pullback from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17360 level then it may test 17450 – 17520 levels, On the downside, 17250 – 17130 levels may act as support for the day.

We maintain our stance that, looking at the current price action it is evident that momentum on the upside is likely to continue. However, a consolidation or a minor pullback cannot be ruled out. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
