Market Technical Outlook

Nifty opened on a positive note and traded with positive bias throughout the day and finally managed to close marginally in green. On the daily chart, we are observing Nifty has touched 100 SMA, which suggests we can see some consolidation at current level. We maintain our stance the upward gap area (17112 to 17161) is likely to act as support for the prices. In coming trading session if Nifty for first hour trades above 17380 levels then it may test 17450 - 17500 levels. On the downside, 17250 - 17150 levels may act as support for the day.

At present looking at the current price action it is evident that one needs to adopt cautiously positive approach at current level.
