Nifty, opened lower traded with negative bias throughout the day to close mildly in red. On the daily chart, we are observing an inside day formation. This suggests indecisiveness prevailing at current level. In coming trading session if nifty trades below 17490 level then it may test 17370 - 17300 levels. On the upside, 17730 - 17840 may act as resistance for the day.

We still maintain our stance that trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.
