Market Technical Outlook

Sensex to end with net gains of 0.71% whereas Nifty gained 0.66% W-O-W.

Pattern Formation: On the Weekly chart, we are observing a narrow range body formation which suggests indecisiveness prevailing at current level. Further, we maintain our stance that the upward gap area in the range of 11426 to 11591 is likely to act as support for the prices going forward. On the Daily chart, we are observing five consecutive narrow range body formations which suggest that markets are cautiously positive at current level. Further, the high of the bearish engulfing pattern of 12041 formed on 23rd May - 2019 holds significance going forward. Hence, if the prices trades and close above 12041 then the said pattern will get negated.

Outlook: The current price action on the weekly and the daily chart suggests that the undertone in the markets is positive. However, a consolidation or minor pullback near the upward gap area cannot be ruled out. At present Nifty has resistance at 12038 – 12104 - 12182 levels whereas on the downside it has support at 11807 – 11740 – 11663 levels. In coming week if Nifty trades and close above 11972 level then it is likely to test 12038 – 12104 - 12182 levels. However, if Nifty trades and close below 11873 level then it can test 11807 – 11740 - 11663 levels.

Since, the weekly trend is up any pull back in the range of 11807 - 11740 should be viewed as buying opportunity for a target of 12100 - 12200 - 12300 levels in couple of weeks.
