Market Technical Outlook

Nifty opened on a subdued note traded with choppiness and finally close marginally in green. On the daily chart, we are observing that prices for three consecutive trading session have close convincingly above the falling 200-days SMA (17016). Hence a consolidation or minor pullback from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17390 levels then it may test 17460 – 17500 levels, On the downside, 17230 – 17140 levels may act as support for the day.

We still maintain our stance that, looking at the current price action it is evident that momentum on the upside is likely to continue. However, a consolidation or a minor pullback cannot be ruled out. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
