Market Technical Outlook

Nifty opened higher traded with choppiness but momentum on the upside intensified in the latter half of the session which led nifty to close near days high. On the daily chart we are witnessing a higher high formation which suggests upside momentum. In coming trading session if Nifty for first hour trades above 17245 level then it may test 17350 –17480 levels. On the downside, 17100 – 17000 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
