Market Technical Outlook

On 03/07/2019 markets opened higher traded with choppiness but finally managed to close in green. On the sectorial front, Realty, Oil & Gas, Capital Goods and Power ended on the gainers side whereas Consumer Durable and Utilities ended with minor losses. The advance decline ratio was in favour of declining counter (Advances= 1314 Declines= 1165).

Pattern Formation: On the Daily Chart, we maintain our stance that the momentum indicators are gaining strength.

Outlook: The current price action on the daily chart suggests that momentum on the upside is likely to continue. In coming trading session, if Nifty trades above 11950 level then it is likely to test 12000 – 12020 levels. On the downside 11870 – 11810 levels may act as support for the day.

We still maintain our stance that the undertone in the markets is positive and stock specific activity is likely to continue.
