**Market Technical Outlook** 

Nifty opened higher and traded in a narrow range with positive bias to close in green. On the daily chart, prices have taken support near the upward gap area of 21477 to 21495 by making a low of 21500. This clearly suggests that momentum on the upside is likely to continue. In coming trading session if nifty for first hour trades above 21685 then it may test 21750 – 21850 levels. On the downside, 21540-21460 levels may act as support for the day.

Broadly, looking at the current price action it is evident that markets may consolidate or witness minor correction from current level. However, we maintain our view that the trend is up and markets are likely to test 22000 - 22300 levels in couples of weeks. Hence, one should adopt cautiously positive approach at current level as stock specific activity is likely to continue.
