### Market Technical Outlook

Nifty, opened lower in wake of weak global clue and momentum on the downside intensified in the latter half of the session which dragged nifty to close in red. On the daily chart, we are observing a “Doji” candlestick pattern which suggests indecisiveness prevailing at current level. In coming trading session if Nifty trades above 15205 then it may test 15250 -15350 levels. On the downside, 15000 – 14850 levels may act support for the day.

**We maintain our stance that as long as nifty holds 50-day SMA (14559) there is high probability that nifty is likely to make a new all-time high and extend its gains further. Hence, one needs to adopt cautiously positive approach towards the market as stock specific move is likely to continue.**
