Market Technical Outlook

Nifty, opened higher in wake of positive global clues and traded with positive bias throughout the day to close in green. On the daily chart we are observing prices have closed above 20-day SMA (14840) as well as the 50-day SMA (14786). This suggests that the undertone in the market is turning positive. In coming trading session if Nifty trades above 14890 then it may test 15000 – 15100 levels. On the downside, 14750 – 14680 levels may act as support for the day.

Since, the prices have closed below the 50-day SMA (14786), one can adopt cautiously positive approach at current level. However, stock specific activity is likely to continue.
