### Market Technical Outlook

Nifty, opened higher but was unable to sustain the opening gains and selling in the latter half of the session dragged down nifty to close in red. On the daily chart we are observing that prices have closed below the 21days-SMA (14609 shown in green in the above graph) and are still trading below the falling 50-day SMA (14752 shown in red in the above graph). This suggests weakness. In coming trading session if nifty for first hour trades below 14450 levels then it may test 14350 – 14250 levels. On the upside, 14600 – 14700 levels may act as resistance for the day.

We still maintain our stance that, one needs to adopt cautious approach at current level. However, stock specific activity is likely to continue in small and Mid-cap stocks.
