Market Technical Outlook

Nifty, opened on a subdued note but momentum on the upside intensified as the day progressed which led nifty to close on a strong note. On the daily chart, we are observing that prices have closed above the supply zone of 18150 – 18200. This suggests that upside momentum is likely to continue. In coming trading session if nifty trades above 18280 level then it may test 18350 – 18460 levels. On the down side, 18130 – 18050 levels may act as support for the day.

Broadly, looking at the major pattern of inverse head and shoulder formed above 17900 level suggests that market is heading to test all-time high or even head higher in couple of weeks. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
