Nifty opened lower traded with extreme choppiness but finally managed to close in green. On the daily chart, we are observing that prices after taking support at the 50-days SMA (11570) is heading higher. We maintain our stance that the immediate resistance is at 11930 levels. Any move above 11930 would propel Nifty to test 12000 – 12100 levels in couple of days. On the downside, 11800 - 11680 levels may act support for the day.

Broadly, as long as Nifty holds 11570 level (50-day SMA) there is high probability that Nifty may test 12000 – 12100 levels. Hence, one should adopt cautiously positive approach at current level. However, stock specific activity is likely to continue.
