Nifty, opened lower in wake of week global clues, however witnessed buying in the latter half of the session which led the indices to close in green. On the daily chart we are still observing a continuation of higher highs which suggests that the undertone is still positive. In coming trading session if Nifty trades above 14215 level then it may test 14300 - 14400 levels. On the downside, 14100 - 14000levels may act as support for the day.

We still maintain our stance that the upward gap area and higher highs formations on the daily Nifty chart suggests that momentum on the upside is likely to continue. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
