**Market Technical Outlook** 

Nifty, opened higher initially traded with negative bias but witness upside momentum in the latter half of the session to close in red. On the daily chart, we are observing that prices have formed bull candle and have tested the upper trendline of the falling channel (shown above in the graph). This suggests that upside momentum is likely to continue. In coming trading session if nifty trades above 17870 level then it may test 17980 – 18060 levels. On the downside, 17750 – 17640 levels may act as support for the day.

We still maintain our stance that trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.
