Market Technical Outlook

Nifty opened up with a gap and traded in a narrow range throughout the day to close in green. On the daily chart, we are observing three consecutive narrow range body formations with higher highs. This suggests indecisiveness prevailing at current level. In coming trading session if prices traded above 10640 then it may test 10750 - 10850 levels. On the downside, 10450 - 10350 levels may act as support for the day.

The undertone in the market is positive. However, the narrow range body formation with higher high gives small indication that a consolidation or minor correction cannot be ruled out. Hence cautiously positive approach at current level should be adopted as stock specific move is likely to continue.
