Market Technical Outlook

Nifty, opened lower trade in a narrow range with negative bias throughout the day to close in red. On the daily chart, we are observing an inside day formation which suggests indecisiveness prevailing at current level. Further, we reiterate our view that prices are facing resistance at the upper trendline of the falling channel (shown above in the graph). In coming trading session if nifty trades above 17810 level then it may test 17880 - 17960 levels. On the downside, 17650 – 17540 levels may act as support for the day.

We still maintain our stance that trend remains down and pullback rally, if any is likely to attract selling pressure. Hence, cautious approach at current level should be adopted.
