### Market Technical Outlook

Nifty opened higher and was unable to sustain the opening gains and selling drag nifty to close marginally in red. On the daily chart we are observing, four consecutive narrow range body formations which have closed above the 20-days SMA (17496). This suggests that markets are cautiously positive at current level. In coming trading session if nifty for first hour trades above 17685 levels then it may test 17760 – 17830 levels. On the downside, 17530 – 17450 levels may act as support for the day. **We maintain our stance that the 20-daysSMA (17496) remains crucial support. Any close below 17496would indicates sign of weakness. Hence, one need to be cautious at current level. However, stock specific activity is likely to continue.**
