Market Technical Outlook

Nifty opened lower initially traded with negative bias but smart recovery from day's low was witnessed in the latter half of the session which led the indices to close in green. On the daily chart we are observing that prices on intraday basis breached 12000 level but have closed below it. However the current price clearly indicates that the undertone in the market is positive and stock specific activity is likely to continue.

In coming trading session if Nifty opens in the range of 11930 - 11900 then, go long, with a stop loss of 11880 for a target of 12001 - 12024 - 12059 levels.
