Nifty, opened on a subdued note but witnessed upside momentum in the final hour of the trade which led nifty to close in green. On the daily chart, we are observing a positive candle formation which indicates that upside momentum is likely to continue. In coming trading session if nifty trades above 18135level then it may test 18220–18310 levels. On the downside, 18000 – 17900 levels may act as support for the day.

We still continue to maintain our stance that, looking at the position of the short term moving averages and position of the momentum indicator viz. RSI. We are of the opinion that momentum on the upside is likely to continue. Hence, one should adopt positive approach at current level.
