Market Technical Outlook

Nifty, opened up with a gap traded with positive bias throughout the day to close in green. On the daily chart we are observing an upward gap area in the range of 19276 – 19306. Normally, upward gap area does act as support for the price. In coming trading session if nifty trades above 19430 level then it may test 19510– 19600 levels. On the downside, 19300 – 19200 levels may act as support for the prices.

Looking at the current price action, it is evident that nifty has made higher high formation which suggests that momentum on the upside is likely to continue. In such scenario nifty may test 19423 – 19563 levels in couple of days. Hence, one should adopt cautiously positive approach at current level.
