Market Technical Outlook

Nifty opened up with a gap traded in a narrow range with positive bias to close in green. On the daily chart, we are witnessing two upward gap area 1) in the range of 20291 to 20507 & 2) 20702 to 20711. Normally upward gaps area does act as support for the price. At present the undertone is positive. Apart from that we are observing “Doji” candlestick formation which suggests some consolidation at current level. We maintain our stance that prices are far away from the short term moving averages this suggests that a consolidation of previous rise cannot be ruled out. In coming trading session if nifty trades above 20950 level then it may test 21050 - 21100 levels. On the downside, 20850 – 20700 levels may act as support for the prices.

Broadly, looking at the current price action it is evident that momentum on the upside is likely to continue. Hence, one should adopt positive approach at current level as stock specific activity is likely to continue.

Foreign Institutional Investments (FII's) Activities

| Name of Segment | Net Buyer/seller | Rs In Cr |
|-----------------------------|------------------|------------------|
