#### **Market Technical Outlook**

On 07/03/2019 markets opened higher traded in a narrow range with choppiness and finally close with marginal gains. On the sectorial front Capital Goods and FMCG ended with decent gains whereas Consumer Durable, Metal and Oil & Gas ended on the losing side. The advance decline ratio was in favour of declining counter (Advances = 1309 Declines = 1349).

**Pattern Formation**: On the Daily Chart we are observing two consecutive narrow range body formations with higher high.

**Outlook**: In view of the above pattern formation it is evident that the undertone in the market is positive. However, a consolidation also cannot be ruled out at current level. In coming trading session if Nifty trades and close 11095 level then it can test 11150 - 11170 levels. On the downside, 11000 - 10950 levels may act as support for the day.

We maintain our stance that the undertone has turned positive and stock specific activity is likely to continue.
