Market Technical Outlook

Nifty opened lower in wake of weak global clues but recovered some of its losses during the day to close in red. On the daily chart we are observing, five consecutive narrow range body formations which have closed above the 20-days SMA (17508). This suggests that markets are cautiously positive at current level. In coming trading session if nifty for first hour trades above 17650 levels then it may test 17750 – 17860 levels. On the downside, 17520 – 17430 levels may act as support for the day.

We still maintain our stance that the 20-days SMA (17508) remains crucial support. Any close below 17508 would indicate sign of weakness. Hence, one needs to be cautious at current level. However, stock specific activity is likely to continue.
