Nifty traded with positive bias on "Muhurat" trading to close in green. We maintain our stance that on the daily chart, we are observing that prices have taken resistance at the 21-day SMA (18043) and is trading well below it. In coming trading session if nifty for first hour trades above 18000 levels then it may test 18050 - 18100 levels. On the downside, 17800 - 17700 levels may act as resistance for the day.

We still maintain our view that immediate resistance for nifty is at 18843 levels (21-day SMA). Any daily close above the mentioned level would intensify the upside momentum. Hence, cautiously positive approach should be adopted at current level.
