Market Technical Outlook

Nifty, opened lower traded with choppiness but witness upside momentum in the later half of the session to close marginally in red. On the daily chart we are observing two consecutive Doji candlestick pattern which suggests that markets are circumspect at current level. We maintain our stance that in coming trading session if nifty trades above 19430 level then it may test 19510– 19600 levels. On the downside, 19300 – 19200 levels may act as support for the prices.

Looking at the current price action, it is evident that nifty has made higher high formation which suggests that momentum on the upside is likely to continue. In such scenario nifty may test 19423 – 19563 levels in couple of days. Hence, one should adopt cautiously positive approach at current level.
