Market Technical Outlook

Nifty opened higher and as day progress we have seen good positive move through out day which lead to close in green. On the daily chart, we are observing Nifty still holding 100 SMA & BankNifty holding 200SMA this suggest some consolidation at this level can continue and still some selected Mid-Cap stock will perform. In coming trading session if Nifty for first hour trades below 17100 level then it may test 17020 - 16900 levels. On the upside 17280 - 17350 levels may act as resistance for the day. **We still maintain our stance that the daily trend remains down hence any pullback rallies is likely to attract selling pressure. Hence, one needs to adopted cautious approach at current level. However, stock specific activity is likely to continue.**
