Market Technical Outlook

Nifty opened with flat note and traded in a narrow range with negative bias to close in red. On the daily chart, we are witnessing two consecutive narrow range body formation and we maintain our stance that prices are far away from the short term moving averages this suggests that a consolidation of previous rise cannot be ruled out. In coming trading session if nifty trades above 20950 level then it may test 21050 - 21100 levels. On the downside, 20850 – 20700 levels may act as support for the prices.

Broadly, looking at the current price action it is evident that momentum on the upside is likely to continue. Hence, one should adopt positive approach at current level as stock specific activity is likely to continue.
