Market Technical Outlook

Nifty, opened on a subdued note but momentum on the downside intensified as the day progressed which led nifty to close in red. On the daily chart we are observing three consecutive bear candle with lower lows this suggests weakness. In coming trading session if nifty trades below 17790 level then it is likely to test 17750 - 17640 levels. On the upside, 17950 – 18070 levels may act as resistance for the day.

We continue to maintain our stance that prices are trading below the 50-daySMA (18300), hence one needs to adopt cautious approach at current level.
