Nifty, opened lower in wake of weak global clue but witness smart recovery in the final hour of trading session to close in green. On the daily chart, we are observing that prices tested the upward gap area of 17644 to 17671 by making a low of 17602 and close well above it. Further, we are witnessing that prices have reclaimed the 20-daySMA which suggests that sentiments are turning positive. In coming trading session if nifty trades above 17780level then it is likely to test 17850 - 17940 levels. On the downside 17650 -17530 levels may act as support for the day.

Since prices are trading above the 200-days SMA (17403) one needs to adopt cautiously positive approach at current level.
