Source: BSE

Nifty opened higher but was unable to sustain the opening gains and volatility dragged nifty to close marginally in red. On the daily chart we are witnessing three consecutive narrow range body formations which suggest that a consolidation or minor pullback from current level cannot be ruled out. In coming trading session if Nifty for first hour trades above 17383 levels then it may test 17450 – 17570 levels. On the downside, 17240 – 17170 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue.
