### Market Technical Outlook

Nifty opened higher in wake of positive global clues, traded with choppiness but finally close in green. On the daily chart, we are observing that prices have marginally close above the 21-day SMA (18064). This suggests that the undertone is positive. In coming trading session if Nifty for first hour trades above 18087 level then it may test 18150 - 18250 levels. On the downside, 17850 – 17730 levels may act as resistance for the day.

Since prices have close above the 21-day SMA (18064). Hence, cautiously positive approach should be adopted at current level.
