### Market Technical Outlook

Nifty, opened up with a gap and traded with positive bias throughout the day to close in green. On the daily chart we are observing three narrow range body formation with higher highs this suggests that the undertone is turning positive. Further, price have started trading above the falling 50-day SMA (14729 shown in red in the above graph). In coming trading session if Nifty for first hour trades above 14870 level then it is likely to test 14950 - 15100 levels. On the downside, 14700- 14600 levels may act as support for the day.

We maintain our stance that, one needs to adopt cautious approach at current level. However, stock specific activity is likely to continue in small and Mid-cap stocks.
