Market Technical Outlook

Nifty opened on a subdued note and momentum on the upside gradual picked up during the day to close in green. On the daily chart, prices have negated the bearish hanging men pattern formed on 4.08.22 by closing above 17161 level. Further, the RSI has confirmed the upside momentum and indicates that momentum on the upside is likely to continue. In coming trading session if Nifty for first hour trades above 17550 level then it may test 17670 - 17720 levels. On the downside, 17410 - 17330 levels may act as support for the day.

We still maintain our stance that the 200-days SMA (16996) is showing sign of flattening there is high probability that momentum on the upside may continue. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
