**Market Technical Outlook** 

Nifty opened lower traded in a narrow range with negative bias to close in red. On the daily chart, we are observing that prices have closed below the falling 50-days SMA19601 and formed a Doji candlestick pattern. This clearly suggests that markets are circumspect at current level. In coming trading session if nifty trades and close below 19480 level then it may test 19370 – 19280 levels. On the upside, 19630 – 19720 levels may act as resistance for the day.

We still maintain our stance that there is strong supply zone in the range of 19600 to 19766 levels. If nifty manages to close above it, then only it will resume its upside momentum. Hence, cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.
