### Market Technical Outlook

Nifty opened higher traded in a narrow range with negative bias to close in red. On the daily chart we are observing series of “narrow” range body formation and not able to cross 100DMA which suggests that markets are circumspect at current level. In coming trading session if nifty trades above 19450 levels then it may test 19550 – 19630 levels. On the downside, 19350 – 19280 levels may act as support for the prices.

Looking at the current price action, it is evident that nifty has made higher high formation which suggests that momentum on the upside is likely to continue. In such scenario nifty may test 19563 levels in couple of days. Hence, one should adopt cautiously positive approach at current level.
