Nifty opened higher traded with extreme choppiness but finally close in green. On the daily chart, we are observing three consecutive candle with higher close. This suggests that momentum on the upside is likely to continue. In coming trading session if Nifty for first hour trades trade above 17545 level the it may test 17620 - 17730 levels. On the downside, 17400 - 17300 levels may act as support for the day. Since, 7<sup>th</sup> Dec-21 trading session was with higher volumes we are of the opinion that 16782 may be an intermediate bottom. Hence cautiously positive approach at current level should be adopted.
