### Market Technical Outlook

Nifty opened higher traded with positive bias throughout the to close in green. On the daily chart, we are observing three consecutive narrow range body formations with higher highs. This suggests markets are cautiously positive at current level. In coming trading session if Nifty for first hour trades above 18020 level then it may test 18120 – 18230 levels. On the downside, 17900 - 17800 levels may act as support for the day.

**We continue to maintain our stance that prices have entered the supply zone shown above in the graph. Hence, we may see some consolidation or minor pullback of the current rally. Hence, needs to adopt cautiously positive approach at current level.**
