### Market Technical Outlook

Nifty opened higher, traded with choppiness but witness buying in the latter half of the session to close in green. On the daily chart, we are observing that prices took support at the demand zone of **17400 to 17600** levels and formed a positive candle. This suggests that momentum on the upside is likely to continue. In coming trading session if Nifty for first hour trades above 17845 level then it is likely to test 17900 – 18000 levels. On the downside, 17680 – 17550 levels may act as support for the day. **Since, price have taken support at the demand zone mentioned above we expect nifty to test 18000 – 18200 levels in couple of weeks. Hence, cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.**
