Source: BSE

Nifty opened higher but was unable to sustain the opening gains and finally managed to close in red. On the daily chart, we are observing that prices have marginally close below the 21-day SMA (18076). Any strong close above 18076 level would propel the upside momentum. In coming trading session if Nifty for first hour trades above 18087 level then it may test 18150 - 18250 levels. On the downside, 17850 - 17730 levels may act as resistance for the day.

Since prices have close marginally below the 21-day SMA (18076). Hence, cautiously positive approach should be adopted at current level.
