Market Technical Outlook

Nifty opened higher and momentum on the upside intensified ass the day progressed which led nifty to close in green. On the daily chart, we are observing that prices have closed above the 50-days SMA19602 and formed a bull candle. This suggests that momentum on the upside is likely to continue. In coming trading session if nifty trades and close above 19720 level ten it may test 18800 – 1890 level. On the downside, 19600- 19480 level may act as support for the day.

We still maintain our stance that there is strong supply zone in the range of 19600 to 19766 level. If nifty manages to close above it, then only it will resume its upside momentum. Hence, cautiously positive approach should be adopted at current level as stock specific activity is likely to continue.
