### Market Technical Outlook

Nifty opened lower traded with negative bias throughout to close in red. On the daily chart, we are observing that prices for two consecutive trading session closed below the 21-day SMA (18081). We maintain our stance that any strong close above 18081 level would propel the upside momentum. In coming trading session if nifty for first hour trades above 18061 level then it may test 18120 - 18210 levels. On the downside, 17910 - 17800 levels may act as support for the day.

**Since prices have close marginally below the 21-day SMA (18081). Hence, cautiously positive approach should be adopted at current level.**
