Market Technical Outlook

Nifty, for the second consecutive trading session opened higher traded in a narrow range throughout the day with positive bias to close in green. On the daily chart, we are observing two consecutive “Doji” candlestick patterns at the supply zone of 17573 to 17799 with higher high. Further, prices have given a breakout of falling channel. This suggests that there is high probability that prices may trade and close above the supply zone mentioned above. In coming trading session if nifty trades above 17750 level then it may test 17799 – 17900 levels. On the downside, 17610 – 17540 levels may act as support for the day.

The current price action has given a breakout of the falling channel, however prices are still trading within the supply zone of 17573 to 17799. Hence some consolidation or minor pullback cannot be ruled out. Hence, one needs to adopt cautiously positive approach at current level as stock specific activity is likely to continue.
