Market Technical Outlook

Nifty opened higher but witnessed selling pressure in the first half of the session which dragged nifty in red. However, smart recovery during latter half of the session led nifty to close marginally in green. On the daily chart we are observing five consecutive narrow range body formations which suggest that market are circumspect at current level. Hence, a consolidation or minor pullback of previous rise cannot be ruled out. In coming trading session if Nifty for first hour trades above 16340 then it may test 16390 - 16450 levels. On the downside, 16170 - 16050 levels may act as support for the day.

We still continue to maintain our stance that stock specific activity is likely to continue in small and Mid-cap stocks.
