### Market Technical Outlook

Nifty opened with flat note and traded with tight range throughout a day but witness smart recovery in last half hour which led the indices to close near days high. On the daily chart, we are observing narrow range body formation & oscillator giving some oversold indication. Hence a bounce from current level cannot be ruled out.

In coming trading session If Nifty open in the range of 11840 - 11820 levels then go long with a stop loss of 11780 for a target of 11925 - 11950 - 11980 levels.
